Continuation:

Applicant's arguments are fully considered, but do not place the application in allowable form. Applicant argued that the introduction into the specification and the claims (1-17) is not new matter, stating that SONE and SDH are generally equivalent. Examiner respectfully notes that the issue is the introduction of a "new matter" in the specification regardless if that matter was well known in the art at the time of the invention. Therefore, rejection of claims 1-17 under 112 1st Paragraph is believed to be proper.

With reference to art rejection, Applicant argument is fully considered. However, Examiner believes that, given the broadest reasonable interpretation of the claim limitations, that the rejection of the claims (1-17) under the prior art of Chen et al, US (6,501,758) and Bisson et al, US (6,349,092) is proper.
